

Solution Document – Product View Page

E-commerce Website Design

An e-commerce website, by definition, is a website that allows you to buy and sell tangible goods, digital products or services online.

Here we need to design a website with basic pages/features which are necessary for an e-commerce website.

Technology

We will be using Bootstrap, HTML, CSS, jQuery & JavaScript for designing the project.

Pages

| | | | | |
|----------|--------------------|--------------|------------|--------|

In the previous document, we have created “Product List Page”, Now we will be designing “Product View Page”.

Product View Page

So, what is a product view page?

A product view page OR product details page (PDP) is a web page on an eCommerce site that presents the description of a specific product in view. The details displayed often include size, color, price, shipping information, reviews, and other relevant information customers may want to know before making a purchase.
